

Dear Students,

We are pleased to invite you to the **Summer School** organised in cooperation with our partner universities within the frame of the Erasmus+ programme:

GREEN SOLUTIONS FOR BUSINESS AND INDUSTRY

28 August - 10 September 2016

**ŠKODA AUTO University
Mladá Boleslav, Czech Republic**

The working language of the programme is English.

The programme will focus in particular on green logistics and sustainable solutions in business. It includes solving case studies from practice, active workshops led by experts in the field and excursions to companies from the automotive industry. The students will receive for the successful graduation 3 ECTS.

The programme also includes:

- Subjects related to logistics.
- Guest speakers.
- Excursions and field trips.
- Social and cultural programmes, sport and entertainment.

Costs for participants:

Thanks to the Erasmus+ grant, the tuition, seminars, centrally organized excursions and field trips as well as the organised cultural, sport and entertainment programmes are free of charge.

The participants from our partner universities in Dresden, Seinäjoki, Regensburg, Wrocław and Žilina will receive a scholarship for their travel and daily cost of the programme. Accommodation is arranged by ŠKODA AUTO University at the hostel Na Karmeli (50 meters from the university). Meals and other costs will be easily covered by the rest of the Erasmus+ grant.

It is a great chance to stay at a partner university for a short time (if you still hesitate and/or are considering one or two semesters abroad), work in international groups, learn about the Czech Republic, the towns of Mladá Boleslav, Prague and their surroundings, meet new people and cultures, find out about the study programmes at SAU and introduce your home university, earn ECTS, have fun, gain new experience and discover new opportunities.

The programme is open for bachelor and master degree students.

Summer School International Team:

ŠKODA AUTO University team

Mgr. Lenka Stejskalová, MBA

Vice-Rector for International Relations and programme coordinator

Prof. Ing. Radim Lenort, Ph.D.
