## Actual Topics about Financial Management in the USA

Prof. Kamienski (USA)

## Life cycle and supply chain management of German companies

Prof. Gestring (D)

UNIZA, FRI, 27.10.2016, RC009, from 9.00 AM

Al Kamienski

Dr. Al Kamienski brings more than 10 years of corporate experience to his finance and economics classrooms. He is the 2013 recipient of the Zenos Hawkinson Award for Teaching Excellence and the founder of the grant-funded Freedom Forum, exploring issues of economic freedom in theory and practice. Dr. Kamienski's international teaching experience includes business courses taught in Spain, China, and Belgium.

Dr. Kamienski's successful career in management consulting and corporate finance, along with his continuous consulting work with both for-profit and nonprofit organizations, gives him the advantage of knowing what skills and abilities new graduates need to be successful, and he creates courses that will help students meet those demands. "The way my courses are designed is an intentional progression from content acquisition to contextual problem-solving and finally to application of the content so that students are prepared to add immediate value to the organizations from which they launch their careers," he says. "It's the general skills that are the differentiators for students. Things like leadership, creativity, communications, and teamwork—all those intangible things that employers value in the workplace."

#### Education

PhD, Educational Psychology, Loyola University, Chicago

MBA, Kellogg Graduate School of Management, Northwestern University

BA, Economics, University of Illinois at Urbana-Champaign

Ingo Gestring

Ingo Gestring is the Dean of the Faculty for Business Administration. After receiving his diploma and PhD at the University of Hanover Germany and the University of Wisconsin Madison, he worked several years in the automotive industry in Germany and England. He was director of production and logistics of luxury car automotive plant.

His recent studies are about lean logistics and sustainable supply chain management. He is director of the research institute *Center for Small and Midsize Enterprises* at the HTW Dresden.

The HTW Dresden is the second largest university in the capital of Saxony. It offers more than 40 field of studies. The faculty of Business Administration is with more than 1,000 students the biggest faculty. It offers 3 bachelor and 4 master degree programs in business administration, engineering and management, international business, human resource management and management of SME.
