

Avans University of Applied Sciences offers a possibility to join the 3 ECTS Erasmus Blended Intensive Program to

*“Discovering opportunities to maintain qualitative, feasible, and accessible health care,
a cross-borders business approach on different health care systems”*

Spring 2025

As people in the European Union become older and older we need more and better healthcare. Furthermore, the increasing healthcare budget, threatening shortage on medicines and other materials, quest for qualified employees, makes this even a bigger challenge than ever before. Technological developments seems to make the difference, however, is that enough?

The BIP aims to identifying trends, best practices, and opportunities in the healthcare sector in different European countries to maintain the feasibility, access, and quality of the health care systems for the upcoming decade. In interdisciplinary teams you will be working in virtual and physical circumstances during this project to share practices and bring up ideas to sustain the health care in our home-countries.

Primary plan

Phase 1 Identification. Online. March 24 - 28, 2025.

Get familiar with your team mates and identify the current problems/challenges of your home-country healthcare system within your chosen domain. Introductory lectures and online team-building activities.

Phase 2 Diagnose. Online. March 31 - April 4, 2025.

Explore your selected health care system in terms of industrial structure, type of companies, national regulations, and financing. What specific challenges should be addressed? What kind of solutions, developments, and experiences are noticeable? And what are the (expected) outcomes?

Phase 3 Improvements. Onsite. April 7 - 11, 2025.

Discuss your findings, compare and take best of different worlds to create a feasible improvement for your home country. Visit the Dutch or European parlement to check on the sustainability of your idea. Summarize and present to each other and representatives of the workfield! Summarize teamwork and evaluate on the BIP.

Hosts:

Jeroen Hufkens, sr lector Accountancy. jfa.hufkens@avans.nl

René-Pascal van den Boom, sr lector Finance & Control. rpm.vandenboom@avans.nl
